Flu-X™

NATURE'S FLU MEDICINE

**A highly effective, patented, herbal
anti-flu and anti-viral spray**

Clinically proven to kill Influenza A and B viruses*

Prevention & relief of Flu and Colds*

Stimulates the immune system*

**Helps prevent and reduce the severity
of Flu and Colds***

DIETARY SUPPLEMENT

SINO PHARMACEUTICALS CORPORATION

THE PRODUCT

The result of over three years of extensive clinical research & development, *Flu-X™* is a highly effective, natural, herbal, over-the-counter (OTC), oral anti-flu spray and is a patented scientific formulation of five standardized Chinese herb extracts. Developed by Professor D. S. Liu, Ph.D, one of China's most eminent and respectable virologists and medical doctors, *Flu-X* began originally as an anti-SARS virus drug during China's SARS epidemic in 2003. Due to its strong anti-viral properties the product was successfully used to treat SARS infected patients and prevent SARS infection at several hospitals in China.

SCIENTIFIC EVIDENCE

Flu-X has undergone numerous scientific studies and animal and human patient clinical trials which demonstrate and confirm that *Flu-X* kills both Influenza A & B viruses upon contact, thus preventing contraction of the flu* and, further, prevents the replication of both Influenza A & B viruses, thereby preventing and reducing the severity of flu and colds and accelerating recovery*.

A 160 patient placebo-controlled clinical trial of patients with Viral Respiratory Tract Infection demonstrated an 82.9% recovery rate in the *Flu-X* group compared to 19.6% in the placebo control group. Further, comparative in-vivo studies on mice confirm the product's superiority to Interferon (a leading anti-viral pharmaceutical) against the influenza virus, offering a protection rate of 55% compared to only 40% for Interferon. In clinical tests *Flu-X* has also been shown to inhibit the H.Influenza, Aureus Staphylococcus and A-hemolytic Streptococcus bacteria strains, associated with secondary flu-related, respiratory bacterial infections.

SAFETY

Long and short term clinical toxicology studies conducted on the product confirm *Flu-X* to be safe even at 400 times the recommended human dosage. Additionally, the product has been used by over 1,000 volunteers and has been shown to be safe and highly effective in the prevention and treatment of influenza, by killing and preventing the replication of the Influenza A & B viruses*.

Flu-X is manufactured in sterile conditions at a certified GMP pharmaceuticals factory, in strict accordance with established pharmaceutical Good Manufacturing Practices.

INVENTOR

Flu-X was developed by Professor D. S. Liu, Ph.D, one of China's most eminent and respectable virologists and medical doctors. Professor Liu has over 40 years experience in molecular biology and virology and graduated as a physician from China's prestigious China Medical University. He completed his post-graduate degree at the China Academy of Medical Sciences under the supervision of Professor Zhu Jiming, the scientist who isolated the first Asian influenza strain in the world, in the 1950's. Professor Liu has worked extensively as a virologist with projects for the World Health Organization (WHO), Royal Post Graduate Medical School, U.K., Wellcome Research Laboratories, U.K., and Peninsular Laboratory Inc., in the USA. He has been awarded the "National Special Contribution Scientist" by the State Council of China and is a member of the editorial committee of the "China Biological Products Journal" and "China Immunology Journal". He is also Scientific Advisor for anti-cancer drug development at Swiss Debiopharm Research Foundation.

PRODUCT INFORMATION

Ingredients: A patented formulation of standardized herbal extracts of Fructus Jujubae, Lignum Santali Albi, Rhizoma Chuanxiong, Radix Glyrrhizae and Rhizoma Atractylodis, in purified water.

Dosage: Adults: 5 sprays per dose. Each spray contains 0.1 ml of liquid extract. Children over 6 years: 4 sprays per dose. Each spray contains 0.1 ml of liquid extract.

Directions: Adults: Spray 5 sprays in the mouth, four times a day, until symptoms are reduced. Children over 6 years: Spray 4 sprays in the mouth, three times a day until symptoms are reduced. Should symptoms last more than 4 days please consult your physician.
